PHARMACEUTICAL
PACKAGING SOLUTIONS

PHARMACEUTICAL PACKAGING SOLUTIONS

-  Complete Packaging Lines
-  Liquid Filling Solutions
-  Capping & Torquing Solutions
-  Labeling, Printing, and Inspection

PHARMACEUTICAL FORMATS WE PACKAGE

- ✓ Drops, Drugs, and Sprays
- ✓ Suspensions, Syrups

With roots in the pharmaceutical industry, Nima Machine has perfected its standards and processes to deliver packaging equipment beyond your expectations.

We began as a designer and builder of pharmaceutical primary packaging equipment.

Our outlook on equipment encompasses hardware, software, and documentation as one customer solution. Our designs ensure compatibility with cGMP standards for equipment design.

The ability to change over equipment quickly with simplified cleaning is fundamental to our designs. We ensure our designs minimize entrapment areas to avoid cross-contamination when changing over. All primary contact parts are of suitable grade Stainless Steel for the application.

Complete equipment documentation packages available to comply with pharmaceutical requirements such as:

- ✓ Factory Acceptance Test Protocol (FAT)
- ✓ Site Acceptance Test Protocol (SAT)
- ✓ Installation/Operation Qualification Protocols (IOQ)

Production and Packaging

Mixing and Packaging

We offer inventive, advanced and automated packaging and filling solutions.

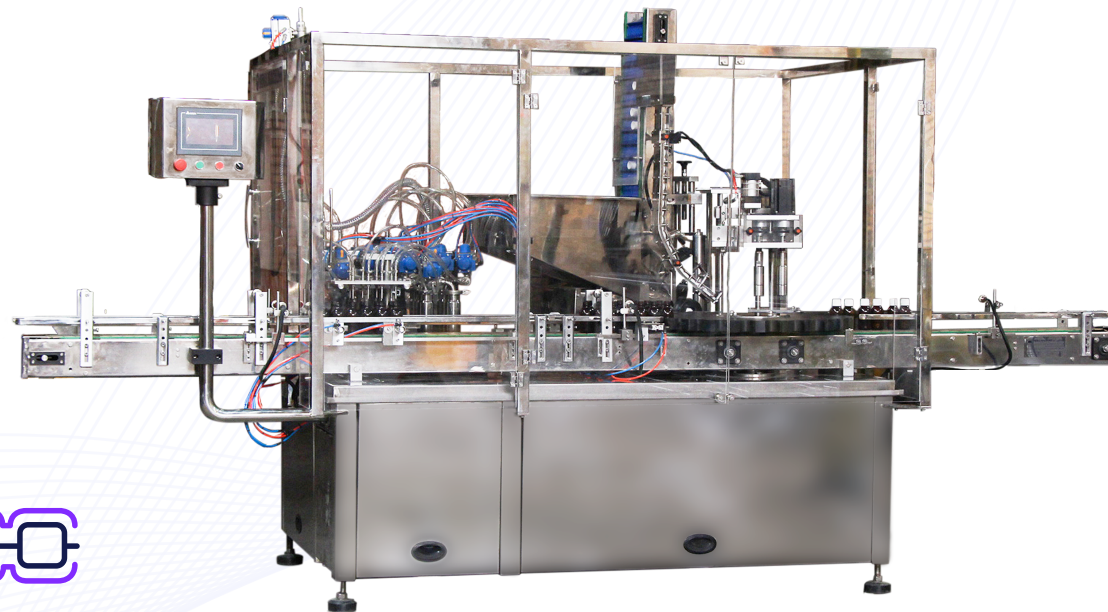

Take the risk out of a multi-vendor packaging line. Nima Machine has developed expertise and relationships in the industries stemming from the many years of successful line integration projects. We can put these attributes to work.

Complete Liquid Line

Complete Turnkey Line Solutions

Fully integrated turn-key packaging line solutions for Liquids.

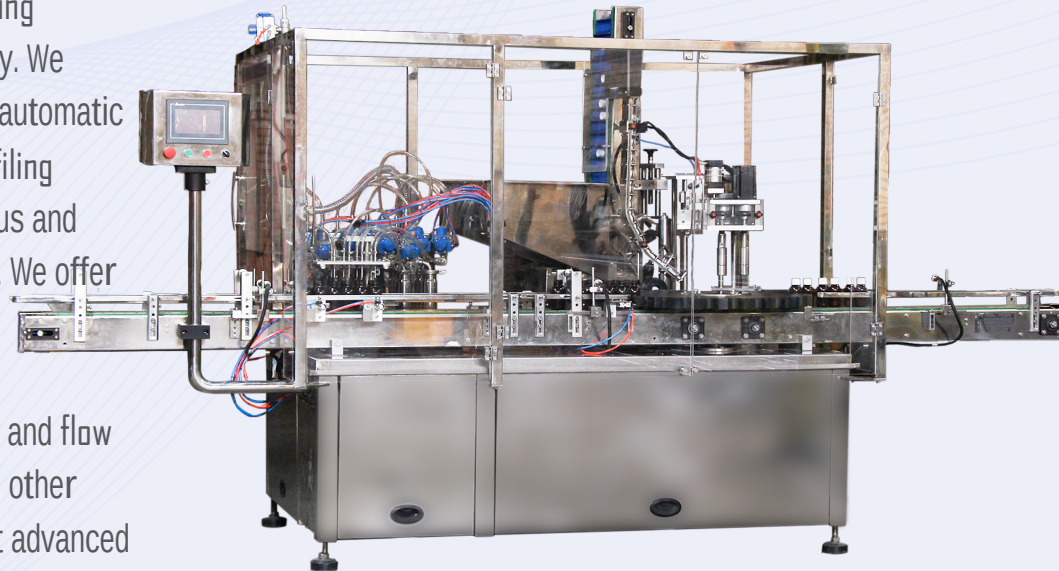

Integrating a turn-key line, introducing new equipment to your packaging line, or reconfiguring the layout of your equipment, Nima Machine puts our experience at your disposal and provides a trouble-free line to handle these integration projects.

Stable Vials and Bottles

Liquid Filling and Capping Monobloc

At Nima Machine, liquid filling machines are our specialty. We offer a full range of semi-automatic and fully automatic liquid filing machines to fill non-viscous and viscous liquids accurately. We offer a wide variety of filing machines that include piston fillers, pump fillers, and flow meter liquid fillers, among other designs. We have the most advanced servo-driven technology for our monobloc liquid filling system.

Servo Fill-Plug-Cap-Torque

Filler Capper

Diagnostic Liquids,
Drops, Syrups,
Sprays.

Our Monobloc is a Fill-Plug-Cap-Torque fully servo-driven packaging system specially designed for applications in pharmaceutical, diagnostics, and biotech industries. It employs precise dispensing using a volumetric piston or peristaltic pumps, and diving nozzles.

From 2 to 10 Pumping Stations

Inline Filler

Filling Liquids

Nima Machine

Our inline filler packaging machine solutions are able to operate as a liquid filling machine packaging solution. Our inline fillers are offered as filler-only standalone models or they can be supplied with our capping systems.

Inline fillers offer an opportunity for fast, accurate, cost-effective, and safe product filling with minimum wastage. Inline Filler packaging machine giving nozzles minimize aeration of products.

This equipment is applicable to pharmaceutical companies to fill syrups like cough syrup, anti-Bacterial soaps, dental gels, and creamy medicine.

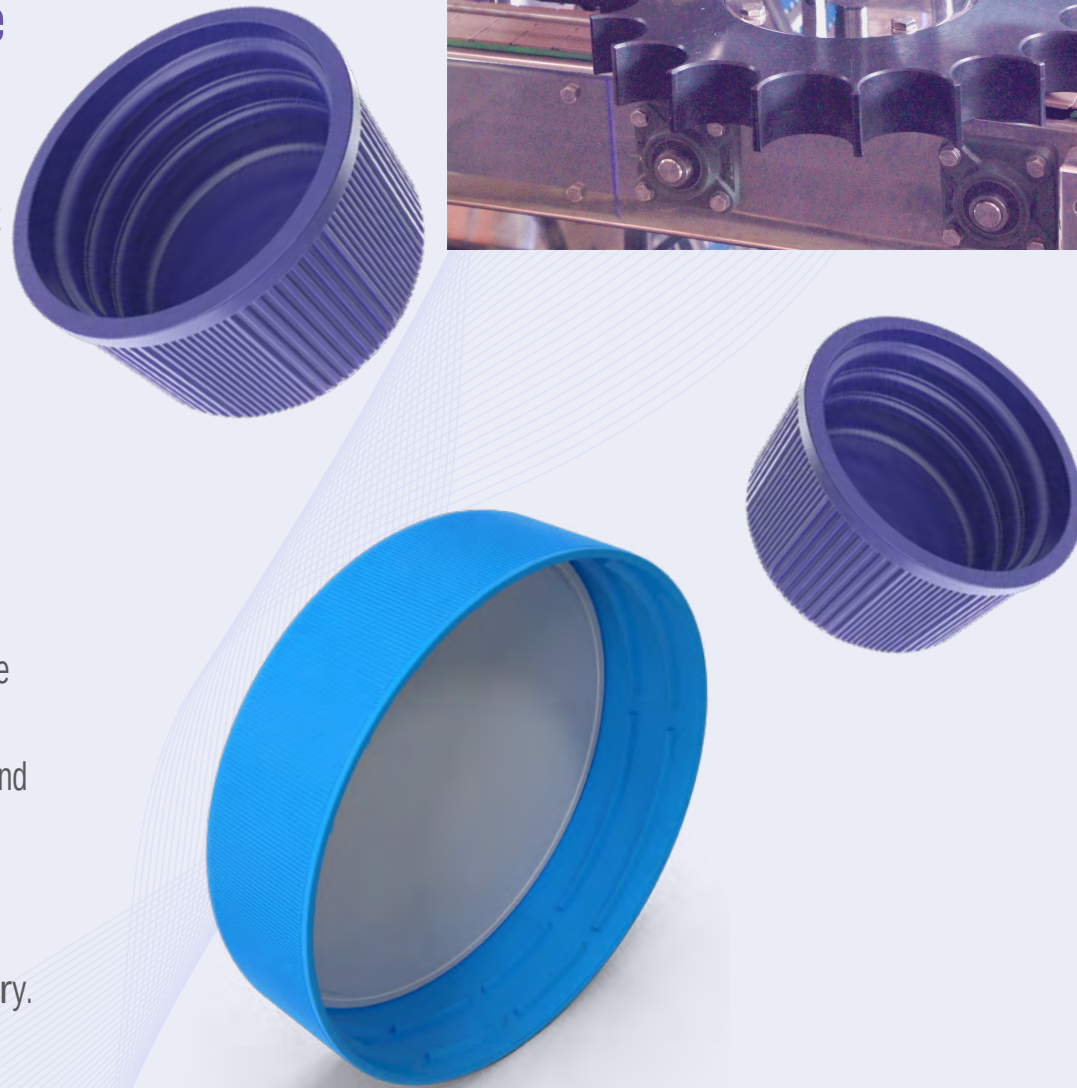

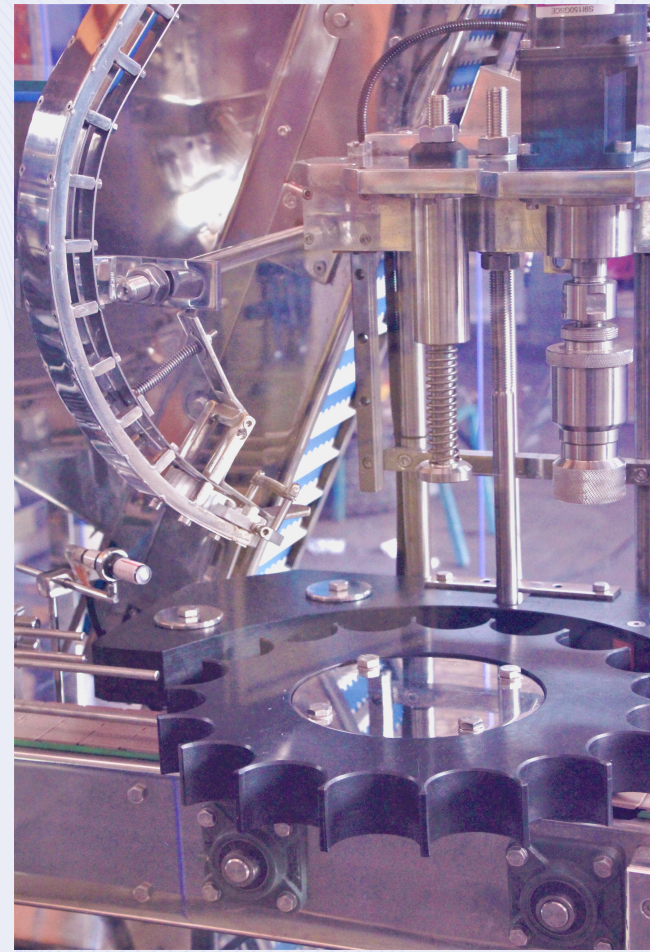

Precision Torque Control

Capping & Torquing

For threaded, press-on, or crimped caps with precision torque

Nima Machine offers automatic bottle capping machines to fit your production needs and our bottle cap machines use cutting-edge technology to reach faster speeds and greater precision.

Our capping machines can handle a wide range of caps and containers without change parts and is more forgiving and easier to set up than most bottle capping equipment in the industry.

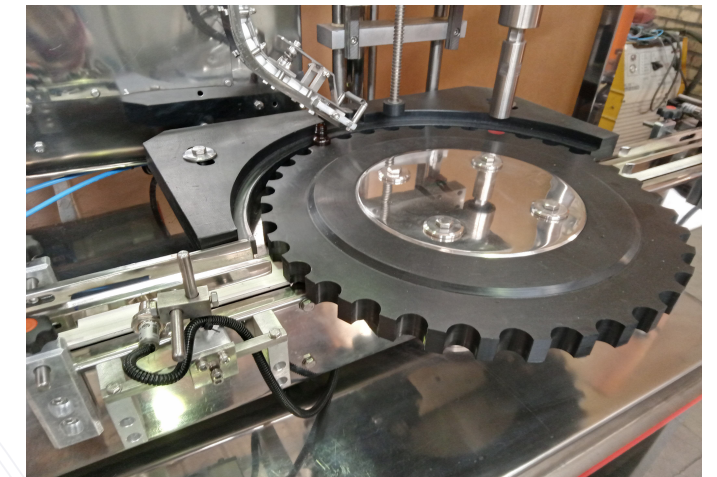

Nima Machine

In-starwheel Cap Applicator

Secure Star Capper

For Higher Speed Capping and Unstable Containers.

Secure Star Capper is an automatic high-speed starwheel cap applicator that consistently applies and torques closures onto containers with accurate and repeatable application torque control.

Suitable for Cleanroom Environment with speeds up to 60 bpm.

Inline Cap Applicator

Secure Chuck Capper

Automatic Capping Machine with Torque Monitoring

Secure Chuck Capper is an automatic in-line cap applicator that consistently applies and torques closures onto containers with accurate and repeatable application torque control.

Aftermarket Support Beyond Expectations

Our highly skilled and customer-focused staff elevate your experience of owning and operating a piece of equipment.

Our approach to installation and start-up assistance of single machines or complete turn-key packaging leverages our equipment expertise and systematic methodology.

Our **highly skilled** staff elevate your experience of owning and operating a piece of equipment.
